

Change in Same Day Results Deadline

Cutoff time of 4:30 PM

We have needed to slightly adjust our submission deadline to allow for courier and optimal turnaround times. Moving forward the cutoff time for same day reporting on routine panels, urinalysis and cytology arriving to the Langley lab is 4:30 pm. Samples received after 4:30 pm will be reported the following day unless it is a STAT sample on a critically ill patient approved by the pathologist on duty.

Over Night Turnaround Times

We will always aim to have late afternoon submissions on your desk by 8 am the following morning during the week and 9 am on Saturdays. Due to a temporary unexpected staffing shortage there is a small chance you may receive a report that is without the expected paired CBC or urinalysis results. The partial reports will be released in case there are valuable preliminary patient results. All efforts will be made to have the CBC or urinalysis follow as early as possible that morning.
